REMARKS

As may be seen by reference to the appended statistics for the year, there is need of punctuality of the pupils. A large variety exists in the number of tardy marks for different schools in the same locality. Punctuality is a part of education and should be encouraged by parents.

The Committee has given prompt attention to all necessary repairs as far as possible. The old-fashioned plank desks have been removed from number seven school and modern desks put in their place. A new floor has been laid also.

Little change has been made in the course of study. The Silver-Burdett Arithmetic has been introduced to take the place of the old text which was badly worn.

The schools are well supplied with text books and only a few will be needed the coming year to replace worn out books.

Most of the teachers I have found devoted to their work. Whatever success has attended the work has been due in a large measure to their untiring efforts.

Whole number of pupils in town April 1, 1914, 253

Whole number weeks taught for year 300.

The town of Carmel received no apportionment out of the equalization fund for the year 1914. This fund is apportioned to those towns whose rate of taxation for common school purposes is considerably in excess of the average rate for the State. The rate of the town of Carmel was considerably below the average in 1913.

Respectfully submitted,

Edwin S. Andrews, Supt. of Schools.

This certifies that I have examined the foregoing accounts of the Superintending School Committee and find them correct.
