REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and Citizens of the Town of Carmel:

I herewith submit the annual report of the schools of Carmel for the municipal year ending February 15, 1936.

TEACHERS

We have been very fortunate in having well trained, experienced teachers. All of our elementary teachers with one exception are normal school graduates. The high school teachers are college trained and experienced. In general, I believe the teachers of Carmel are a very fine professional group of workers, interested in their pupils, and faithful to the best interests of their schools.

VILLAGE SCHOOL

There is an over-crowded condition in the primary and intermediate rooms at the village school which should be remedied as soon as possible. The building, planned for a maximum of one hundred, has housed over one hundred twenty-five this year. If the 7th and 8th grades could be moved to the high school building, the grammar school building would be entirely adequate for the six elementary grades. A six-year high school organization, with departmental work for 7th and 8th grades, under a teacher who could handle one or more of the high school classes, would probably prove very satisfactory. The cost to the town would not be exorbitant, and it seems likely that some state aid could be secured.

TEXTBOOKS

New geographies were purchased this year. Some replacements were made in arithmetics, and many of the very old worn out texts were replaced. It is recognized by health authorities that after years of handling, a textbook becomes a dangerous source of contagion. We still need new reading material, dictionaries, general reference books, and health material.

REPAIRS

The Horseback school building was shingled (one side), a new stove purchased, blackboards painted, and new outside door placed this year. This building is now in good condition, though the north side of the roof should be shingled this year. Several repairs are needed at Damascus, including repairs to stove, seats, and toilets. Lighting conditions at Damascus and the Partridge school are very poor.

HIGH SCHOOL

In order to maintain a Class A rating for the high school it is necessary to conform to the State requirements for Class A schools. One of these requirements is the expenditure each year of \$75.00 each for library and laboratory equipment. The state agent for secondary schools, Mr. Lyseth, has warned us that we must conform to this requirement. He has also warned that for enrollment above sixty, a third teacher must be added. This would be a good opportunity to effect a change to a six-year organization as mentioned above, or to add a course in agriculture. Agricultural courses are subsidized in part by the State.

Some necessary repair work must be done on the high school building this year. The toilets are very poor, and should be replaced by modern sanitary units. Some work must be done on the foundation and at least ten new seats should be bought

ORGANIZATIONS

The following groups have taken an active interest in the schools this year, for which we are very grateful: The Parent-Teacher Association held a minstrel show for the purpose of raising money for schools, especially for seat work material which is very much needed. The American Legion has sponsored an excellent plan for sending five H. S. boys to the Young Men's Conference. Simpson Memorial Library has as usual helped our pupils in every way possible with the library work.

In conclusion, I wish to express my sincere appreciation to the organizations named above, to the S. S. committee, town officials, teachers, pupils, parents, and citizens who have cooperated so willingly in my work.

Respectfully submitted,

BERTHA W. CARTER,

Superintendent of Schools.

REPORT OF HIGH SCHOOL PRINCIPAL

To the Superintendent and the Superintending School Committee:

I herewith submit my report as Principal of Carmel High School.

School opened September 3rd, with an enrollment of fifty-seven. The per cent of attendance for the Fall term was 93.84% which is very satisfactory for a rural school. Absences have been confined to a few pupils for long periods due to illness.

The morale of the student body is excellent. No disciplinary problem exists. With a few exceptions the boys and girls understand clearly what they are coming to school for. An above average standard of daily work is the result.

The fine work in athletics has been continued. The girls' basketball team has even surpassed its fine record of last year and the boys' team is the best to represent the school in many years. However, the real object of a high school athletic program, namely the participation of a large per cent of the student body in some form of physical education, is not being met by the basketball program. Following Mrs. Carter's suggestion, I have given the matter much thought and already have in mind several changes which would more nearly satisfy the aim of such a program.

The aim of the modern secondary school is not to directly prepare any boy or girl for some particular line of endeavor. Its aim is rather that every boy and girl shall acquire such a knowledge of the world in which we live, its problems, government, languages, history past and present, its science and progress and opportunities, that by a growing knowledge of his or her tastes and abilities, they may be able to

choose their future work and engage in that work with success.

I believe that to the very best of the ability of the teaching staff this aim is being pursued in your high school.

I want especially to thank Miss Oliver for her cooperation and for the excellent results she is obtaining; Mr. Elsmore for the excellent condition of the school building at all times; also Mrs. Carter and the members of the school committee for their constant aid in making the first half of school year a successful one.

I should like to make this a special plea to the parents, alumni and friends to come to the school and take an active interest in the work of the institution.

Respectfully submitted,

FARRELL C. INGALLS.
