

ONE BIN ♻️ ALL IN

HOW IS IT POSSIBLE THAT WE WILL BE RECYCLING MORE IF WE ARE NO LONGER SEPARATING RECYCLING?

This new process simply requires less sorting on the part of the citizens. All trash and recycling is sorted on site at Coastal Resources, where wasted materials are recovered, upgraded, and marketed as commodities. The facility offers solutions for plastics, paper, metals, cardboard, glass, and textiles, and recovers and converts virtually all discarded food waste into biofuel and other beneficial use materials. Carmel's rate of recycling will more than double, even though you no longer have to pre-sort your trash and recycling at the curb.
